The Infrastructure Coordinator
Infrastructure Australia
GPO Box 594
Canberra ACT 2601
Australia

Dear Sir

Infrastructure Australia Submission

Thank you for the opportunity to make a submission to Infrastructure Australia regarding infrastructure issues that this Council considers being of national importance.

As part of Council's submission, specific projects have also been identified that relate to the transport sector. These projects are seen as providing a broad economic and social benefit to our growing community and the wider region. In particular the heavy rail extension to both South Morang/Mernda and Epping North is critical to the proper functioning of a large section of Melbourne's current and future population.

In addition to our submission, we have also forwarded two attachments. These provide further details for all the major road projects that are essential to the development of the municipality's road network and via Council's Advocacy Kit, extends the detail to include both transport and community infrastructure requirements of our existing and emerging communities.

These projects provide some definition to the comments made in the submission about facilitating infrastructure implementation.

If you have any queries about the content, please contact either myself or Griff Davis General Manager Advocacy at my office on 9217 2211.

Yours sincerely

David Turnbull
Chief Executive Officer
City of Whittlesea
